A Ray of Hope Charitable Trust

Join us in building a better future for the children

SERVICE LEARNING CERTIFICATE

Date: 14/10/2026

To Whom It May Concern,

This is to certify that **Utkarsh Singh (PRN 24070122224)**, a student of **Symbiosis Institute of Technology, Pune** (B.Tech Computer Science Engineering), **Group No. 13**, was assigned a project by **A Ray of Hope Charitable Trust, Wakad, Pune** as part of the Service-Learning Program.

The student worked on the project **"Saarthi: AI Volunteer Copilot"** for the Trust. A Ray of Hope Charitable Trust works for underprivileged children through regular in-person mentoring, teaching and play, and relies on volunteers to run its sessions. Saarthi is an AI assistant built to support these volunteers. The project includes:

- **Fast lesson planning:** helps volunteers plan lessons quickly, with activities matched to each child's level: struggling, on track or advanced.
- **Session tracking:** records how each child did in a session and suggests what to teach next, so every visit builds on the last.

We confirm that this project was given to the student by our Trust, that we have reviewed the work submitted, and that **we are using the project** to support our volunteers and activities. The student showed commitment, responsibility and a genuine concern for children's welfare throughout, and we thank him for his contribution to the community. We wish him every success in his future endeavours.

Er. Sanjay Kumar
President, A Ray of Hope Charitable Trust
